

Innovative. Efficient. Dependable. Dunkirk.

## XEB

Up to 84.4% AFUE Gas Fired Hot Water Boiler

- Available in 6 sizes from 42 MBH to 225 MBH.
- Dependable Cast Iron Heat Exchanger with Cast Iron Push Nipples. The Sections and Push Nipples expand at the same rate when heated. By using similar materials instead of less expensive gaskets the boiler maintains a water tight seal over time.
- Honeywell High Limit/Electronic Ignition Control.
  - Recessed under the boiler's protective jacket
  - Digital temperature display and diagnostics
  - Plug in connection for the inducer fan
  - Plug in connection for the system pump

Control monitors the water temperature and delays the burner starting until residual heat has been transferred. This maximizes efficiency by turning on the burner only when needed.

- Induced Draft Fan allows flue gases to be pulled through the boiler and exhausted through a chimney or side-wall vent.
- Textured paint Jacket. Small compact design is ideal for low clearance installations.
- Cast to Last Warranty
  - 20 year non-prorated limited warranty

	XEB-7 225.0 186 162 4" 4" 82.0%  (1) MBH = 1,000 Btuh = British Thermal Unit Per Hour. Boilers are equipped for altitudes up to 2,000 feet only. U.S.A. Only - For altitudes above 2,000 feet, ratings should be reduced at the rate of 4% for each 1,000 feet above sea level. Heating Capacity based on D.O.E. (Department of Energy) test procedure.						
	(2) Net AHRI Water Ratings indicate amount of remaining heat input that can be used to heat the radiation or terminal units. Net AHRI Ratings shown are based on an allowance of 1.15 Selection of boiler size should be based upon "Net AHRI Rating" being equal to or greater than calculated heat loss of building. Manufacturer should be consulted before selecting a boiler for installation having unusual piping and pickup requirements.						
	(3) Boiler is provided with a 3" x 4" increaser for chimney vent applications. This does not infer that the connection to the chimney will always be 4". Please refer to IOM, National Fuel Gas Code, ANSI Z223.1/NFPA54, or applicable provisions of the local building codes for details concerning proper chimney connections.

BLOWER 3	Standard Equipment	Boiler Control Module: Recessed Honeywell Control (High Limit/Electronic Ignition Control). User Display Interface: Digital Temperature Display. Heat Exchanger: Cast Iron Sections with Cast Iron Push Nipples. Combustion: Completely Installed and Wired Gas Control System with Titanium Composite Burners and Manifold consisting of: Automatic Redundant Combination Gas Valve, 24 Volt Intermittent Pilot Control, Continuous Retry 100% Shut Off, Combination Pilot Burner/Electrode/Flame Sensor. Electrical: 24 Volt Transformer, Service Switch. Safety: Flame Roll-Out Safety Shut-Off (Fuse Link) and Pressure Switch (vent safety shutoff) with Spare Fuse Link included. Other: Assembled Boiler with Insulated Jacket, Induced Draft Fan, Combination Temperature/Pressure Gauge, Circulator Pump, ¾" Drain Valve, 30lb. ASME Relief Valve.
